

TorqueGeneratedTurboshaft
Word32RangeType

```
graph BT; A["v8::internal::TurboshaftWord32RangeType< TurboshaftWord32RangeType, TurboshaftWord32Type >"] --> B["TorqueGeneratedTurboshaftWord32RangeType"]
```

The diagram illustrates an inheritance relationship. At the bottom is a box representing the base class `v8::internal::TurboshaftWord32RangeType< TurboshaftWord32RangeType, TurboshaftWord32Type >`, which is divided into three horizontal sections. The top section contains the class name, while the two bottom sections are empty. Above this box is another box representing the derived class `TorqueGeneratedTurboshaftWord32RangeType`, also divided into three horizontal sections. The top section of the derived class box contains its name, and the two bottom sections are shaded gray. A blue arrow with a triangular head points from the top section of the base class box to the bottom section of the derived class box, indicating that the derived class inherits from the base class.

v8::internal::Turboshaft
Word32RangeType< TurboshaftWord32
RangeType, TurboshaftWord32Type >
