

```
std::unordered_map  
< K, V, base::hash<  
  K >, std::equal_to<  
  K >, ZoneAllocator< std  
  ::pair< const K, V > > >
```

```
v8::internal::ZoneUnordered  
Map< K, V, Hash, KeyEqual >
```

A blue arrow points from the v8::internal::ZoneUnorderedMap box on the right to the std::unordered\_map box on the left, indicating that the v8 implementation is a specialization or inherits from the standard library version.
