

```
v8::internal::Register  
::GetSpecialRegisterName
```

A diagram showing a call from a function to a template specialization. A grey box on the left contains the function name `v8::internal::Register::GetSpecialRegisterName`. A blue arrow points from this box to a white box on the right. The white box contains the template specialization `v8::internal::RegisterBase< Register, kRegAfterLast >::code`.

```
v8::internal::RegisterBase  
< Register, kRegAfterLast  
>::code
```
