

v8::internal::MacroAssembler
::TestAndBranchIfAllClear

v8::internal::MacroAssembler
::TestAndBranchIfAnySet

v8::internal::MaskToBit

```
graph LR; A["v8::internal::MacroAssembler::TestAndBranchIfAllClear"] --> C["v8::internal::MaskToBit"]; B["v8::internal::MacroAssembler::TestAndBranchIfAnySet"] --> C;
```

The diagram illustrates a code transformation or macro expansion. On the left, two source functions are listed in white boxes: `v8::internal::MacroAssembler::TestAndBranchIfAllClear` and `v8::internal::MacroAssembler::TestAndBranchIfAnySet`. Blue arrows point from each of these source functions to a single target function, `v8::internal::MaskToBit`, which is shown in a gray box on the right.
