

v8::internal::JSReceiver
::GetIdentityHash

v8::internal::JSReceiver
::GetOrCreateIdentityHash

v8::internal::JSReceiver
::SetProperties

v8::internal::anonymous
_namespace{js-objects
::cc}::GetIdentityHashHelper

```
graph LR; A[v8::internal::JSReceiver::GetIdentityHash] --> D; B[v8::internal::JSReceiver::GetOrCreateIdentityHash] --> D; C[v8::internal::JSReceiver::SetProperties] --> D; D[v8::internal::anonymous_namespace{js-objects::cc}::GetIdentityHashHelper];
```

The diagram illustrates a shared helper function for V8's internal JSReceiver methods. Three white boxes on the left represent the methods: `v8::internal::JSReceiver::GetIdentityHash`, `v8::internal::JSReceiver::GetOrCreateIdentityHash`, and `v8::internal::JSReceiver::SetProperties`. Three blue arrows point from each of these boxes to a single gray box on the right, which contains the text `v8::internal::anonymous_namespace{js-objects::cc}::GetIdentityHashHelper`. This indicates that all three methods rely on this common helper function.
