

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class V8_class["v8::internal::compiler::turbohaft::details::ThrowingOpHasProperMembers< CallOp, void >"]
    V8_class --|> std_true_type
```

The diagram illustrates a class hierarchy. At the top is a box representing the `std::true_type` class, which is divided into three horizontal sections. The top section contains the text `std::true_type`, while the two bottom sections are empty. Below this box is a blue arrow pointing upwards, indicating inheritance. The arrow originates from a larger box at the bottom, which represents a V8 internal class. This bottom box is also divided into three horizontal sections. The top section contains the text `v8::internal::compiler::turbohaft::details::ThrowingOpHasProperMembers< CallOp, void >`, while the two bottom sections are empty. The bottom box has a gray background and a black border, while the top box has a white background and a gray border.

v8::internal::compiler
::turbohaft::details
::ThrowingOpHasProperMembers
< CallOp, void >
