Word64SetType< TurboshaftWord64
SetType, TurboshaftWord64Type >

```
graph BT; A["v8::internal::TurboshaftWord64SetType"] --> B["TorqueGeneratedTurboshaftWord64SetType< TurboshaftWord64SetType, TurboshaftWord64Type >"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded box representing the base class, `v8::internal::TurboshaftWord64SetType`. A blue arrow points upwards from this box to a larger white box at the top representing the derived class, `TorqueGeneratedTurboshaftWord64SetType< TurboshaftWord64SetType, TurboshaftWord64Type >`. Both boxes are divided into three horizontal sections. The top section of each box contains the class name, while the middle and bottom sections are empty.
