v8::internal::StringForwarding
Table::Block::UpdateAfterYoungEvacuation

v8::internal::anonymous
_namespace{string-forwarding
-table::cc}::UpdateForwardedSlot

```
graph LR; A["v8::internal::StringForwarding  
Table::Block::UpdateAfterFullEvacuation"] --> C["v8::internal::anonymous  
_namespace{string-forwarding  
-table::cc}::UpdateForwardedSlot"]; B["v8::internal::StringForwarding  
Table::Block::UpdateAfterYoungEvacuation"] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. On the left, two white rectangular boxes represent the source functions: 'v8::internal::StringForwarding Table::Block::UpdateAfterFullEvacuation' (top) and 'v8::internal::StringForwarding Table::Block::UpdateAfterYoungEvacuation' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::anonymous _namespace{string-forwarding -table::cc}::UpdateForwardedSlot'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions are mapped to or implemented by the target function.
