BuiltinsAssembler::AddValueToKeyedGroup

v8::internal::Collections
BuiltinsAssembler::AddToOrdered
HashTable

```
graph LR; A["v8::internal::Collections<br>BuiltinsAssembler::AddToSetTable"] --> C["v8::internal::Collections<br>BuiltinsAssembler::AddToOrdered<br>HashTable"]; B["v8::internal::Collections<br>BuiltinsAssembler::AddValueToKeyedGroup"] --> C;
```

The diagram illustrates a mapping or inheritance relationship between two source functions and a target function. On the left, two white rectangular boxes represent the source functions: 'v8::internal::Collections BuiltinsAssembler::AddToSetTable' (top) and 'v8::internal::Collections BuiltinsAssembler::AddValueToKeyedGroup' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::Collections BuiltinsAssembler::AddToOrdered HashTable'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source functions are mapped to or inherit from the target function.
