

v8::internal::compiler
::BytecodeGraphBuilder
::PrepareEagerCheckpoint

```
graph LR; A["v8::internal::compiler  
::BytecodeGraphBuilder  
::PrepareEagerCheckpoint"] --> B["v8::internal::compiler  
::BytecodeAnalysis::GetInLivenessFor"]
```

A diagram showing a call from the `BytecodeGraphBuilder::PrepareEagerCheckpoint` method to the `BytecodeAnalysis::GetInLivenessFor` method. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
