

v8::internal::compiler
::UnwindingInfoWriter
::eh_frame_writer

```
graph LR; A["v8::internal::compiler  
::UnwindingInfoWriter  
::eh_frame_writer"] --> B["v8::internal::compiler  
::UnwindingInfoWriter  
::enabled"]
```

A diagram showing a transition from a disabled state to an enabled state. On the left, a gray box contains the text 'v8::internal::compiler', '::UnwindingInfoWriter', and '::eh_frame_writer'. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::compiler', '::UnwindingInfoWriter', and '::enabled'.
