

v8::internal::maglev
::MaglevGraphBuilder
::AddNewNodeOrGetEquivalent

```
graph LR; A["v8::internal::maglev  
::MaglevGraphBuilder  
::AddNewNodeOrGetEquivalent"] --> B["v8::internal::maglev  
::Node::needs_epoch_check"]
```

A diagram showing a call from the `v8::internal::maglev::MaglevGraphBuilder::AddNewNodeOrGetEquivalent` method to the `v8::internal::maglev::Node::needs_epoch_check` method. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source box to the target box.
