

v8::internal::compiler
::ControlEquivalence::
AllocateData

```
graph LR; A["v8::internal::compiler  
::ControlEquivalence::  
AllocateData"] --> B["v8::internal::compiler  
::Node::id"]
```

A diagram showing a call from the `AllocateData` method of the `v8::internal::compiler::ControlEquivalence` class to the `id` property of the `v8::internal::compiler::Node` class. The source box is shaded gray and the target box is white. A blue arrow points from the source to the target.
