

v8::internal::wasm
::WasmCode::GetInliningPosition

```
graph LR; A["v8::internal::wasm  
::WasmCode::GetInliningPosition"] --> B["v8::internal::wasm  
::WasmCode::inlining  
_positions"]
```

A diagram showing a call from the `GetInliningPosition` method to the `inlining_positions` property. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
