

v8_inspector::V8Debugger
AgentImpl::searchInContent

v8_inspector::V8Inspector
SessionImpl::searchInTextByLines

v8_inspector::searchInText
ByLinesImpl

```
graph LR; A["v8_inspector::V8Debugger  
AgentImpl::searchInContent"] --> C["v8_inspector::searchInText  
ByLinesImpl"]; B["v8_inspector::V8Inspector  
SessionImpl::searchInTextByLines"] --> C;
```

The diagram illustrates a function delegation or call relationship. Two source functions on the left point via blue arrows to a single target function on the right. The top source function is `v8_inspector::V8DebuggerAgentImpl::searchInContent`. The bottom source function is `v8_inspector::V8InspectorSessionImpl::searchInTextByLines`. The target function is `v8_inspector::searchInTextByLinesImpl`, which is highlighted with a gray background.
