

v8_inspector::V8Inspector
Impl::connect

v8_inspector::V8Inspector
Impl::connectShared

v8_inspector::V8Inspector
Impl::connectImpl

```
graph LR; A[v8_inspector::V8InspectorImpl::connect] --> C[v8_inspector::V8InspectorImpl::connectImpl]; B[v8_inspector::V8InspectorImpl::connectShared] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'v8_inspector::V8InspectorImpl::connect' and the bottom box contains 'v8_inspector::V8InspectorImpl::connectShared'. On the right, there is a gray rectangular box containing the text 'v8_inspector::V8InspectorImpl::connectImpl'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'connect' and 'connectShared' functions delegate or call the 'connectImpl' function.
