

v8::ValueDeserializer
::TransferArrayBuffer

v8::ValueDeserializer
::TransferSharedArrayBuffer

v8::internal::ValueDeserializer
::TransferArrayBuffer

```
graph LR; A[v8::ValueDeserializer::TransferArrayBuffer] --> C[v8::internal::ValueDeserializer::TransferArrayBuffer]; B[v8::ValueDeserializer::TransferSharedArrayBuffer] --> C;
```

The diagram illustrates the relationship between three V8 classes. On the left, there are two white boxes. The top box contains the text 'v8::ValueDeserializer::TransferArrayBuffer' and the bottom box contains 'v8::ValueDeserializer::TransferSharedArrayBuffer'. On the right, there is a gray box containing 'v8::internal::ValueDeserializer::TransferArrayBuffer'. Two blue arrows point from the white boxes to the gray box: one from the top white box and one from the bottom white box. This indicates that both 'v8::ValueDeserializer::TransferArrayBuffer' and 'v8::ValueDeserializer::TransferSharedArrayBuffer' inherit from or delegate to 'v8::internal::ValueDeserializer::TransferArrayBuffer'.
