

v8\_inspector::V8Debugger  
::AsyncEventOccurred

v8\_inspector::V8Debugger  
::asyncTaskScheduled

v8\_inspector::V8Debugger  
::asyncTaskScheduledForStack

```
graph LR; A[v8_inspector::V8Debugger::AsyncEventOccurred] --> C[v8_inspector::V8Debugger::asyncTaskScheduledForStack]; B[v8_inspector::V8Debugger::asyncTaskScheduled] --> C;
```

The diagram illustrates a mapping between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'v8\_inspector::V8Debugger::AsyncEventOccurred' and the bottom box contains 'v8\_inspector::V8Debugger::asyncTaskScheduled'. On the right, there is a gray rectangular box containing the text 'v8\_inspector::V8Debugger::asyncTaskScheduledForStack'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions are mapped to the target function.
