

v8::platform::DefaultPlatform
::PostDelayedTaskOnWorkerThreadImpl

v8::platform::DefaultPlatform
::PostTaskOnWorkerThreadImpl

v8::platform::DefaultPlatform
::priority_to_index

```
graph LR; A[v8::platform::DefaultPlatform::PostDelayedTaskOnWorkerThreadImpl] --> C[v8::platform::DefaultPlatform::priority_to_index]; B[v8::platform::DefaultPlatform::PostTaskOnWorkerThreadImpl] --> C;
```

The diagram illustrates a mapping from two source functions to a single target function. Two white rectangular boxes on the left represent the source functions: 'v8::platform::DefaultPlatform::PostDelayedTaskOnWorkerThreadImpl' (top) and 'v8::platform::DefaultPlatform::PostTaskOnWorkerThreadImpl' (bottom). Two blue arrows originate from these boxes and point to a single gray rectangular box on the right, which represents the target function 'v8::platform::DefaultPlatform::priority_to_index'.
