

v8::internal::MarkCompact
Collector::AddTransitionArray

v8::internal::MarkCompact
Collector::TearDown

v8::internal::MarkCompact
Collector::local_weak_objects

```
graph LR; A["v8::internal::MarkCompactCollector::AddTransitionArray"] --> C["v8::internal::MarkCompactCollector::local_weak_objects"]; B["v8::internal::MarkCompactCollector::TearDown"] --> C;
```

The diagram illustrates a relationship between two source functions and a target object. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::MarkCompactCollector::AddTransitionArray' and the bottom box contains 'v8::internal::MarkCompactCollector::TearDown'. On the right, there is a gray rectangular box containing the text 'v8::internal::MarkCompactCollector::local_weak_objects'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both source functions interact with or point to the target object.
