

v8::internal::Sweeper
::MajorSweeperJob::GetMaxConcurrency

```
graph LR; A["v8::internal::Sweeper  
::MajorSweeperJob::GetMaxConcurrency"] --> B["v8::internal::Sweeper  
::ConcurrentMajorSweepingPage  
Count"]
```

The diagram illustrates a call to the `GetMaxConcurrency` method of the `v8::internal::Sweeper::MajorSweeperJob` class. A blue arrow points from the method call in the left box to the `ConcurrentMajorSweepingPageCount` static variable in the right box, indicating that the method returns the value of this variable.
