

v8::internal::torque
::LogicalAndExpression
::VisitAllSubExpressions

```
graph LR; A["v8::internal::torque  
::LogicalAndExpression  
::VisitAllSubExpressions"] --> B["v8::internal::torque  
::Expression::VisitAllSubExpressions"]
```

A diagram showing a call to the `VisitAllSubExpressions` method on a `LogicalAndExpression` object. The left box, which is shaded gray, contains the code `v8::internal::torque::LogicalAndExpression::VisitAllSubExpressions`. A blue arrow points from this box to a right box, which contains the code `v8::internal::torque::Expression::VisitAllSubExpressions`. This indicates that the `VisitAllSubExpressions` method is being called on the `LogicalAndExpression` object, which is a subclass of `Expression`.
