

v8::internal::maglev
::MaglevGraphBuilder
::ExtendOrReallocateCurrentAllocationBlock

```
graph LR; A["v8::internal::maglev  
::MaglevGraphBuilder  
::ExtendOrReallocateCurrentAllocationBlock"] --> B["v8::internal::maglev  
::VirtualObject::set  
_allocation"]
```

A diagram showing a call from the `ExtendOrReallocateCurrentAllocationBlock` method of `MaglevGraphBuilder` to the `set_allocation` method of `VirtualObject`. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
