

v8::internal::maglev
::Graph::broker

```
graph LR; A[v8::internal::maglev::Graph::broker] --> B[v8::internal::maglev::MaglevCompilationInfo::broker];
```

A diagram showing a relationship between two V8 internal classes. On the left, a gray box contains the text 'v8::internal::maglev' followed by '::Graph::broker' on the next line. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::maglev' followed by '::MaglevCompilationInfo' on the next line, and '::broker' on the third line.
