

v8::internal::Context  
::global\_proxy

```
graph LR; A[v8::internal::Context::global_proxy] --> B[v8::internal::Context::native_context]
```

A diagram showing a pointer relationship between two V8 internal context objects. On the left, a gray rectangular box contains the text 'v8::internal::Context' followed by '::global\_proxy' on a new line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'v8::internal::Context' followed by '::native\_context' on a new line. Both boxes have a thin black border.
