

v8::internal::InstanceType
Checker::IsConsString

```
graph LR; A["v8::internal::InstanceType  
Checker::IsConsString"] --> B["v8::internal::InstanceType  
Checker::IsConsString"]
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The left box has a light gray background and a black border, containing the text 'v8::internal::InstanceType' on the top line and 'Checker::IsConsString' on the bottom line. A dark blue arrow points from the right side of this box to the left side of the right box. The right box has a white background and a black border, containing the same text: 'v8::internal::InstanceType' on the top line and 'Checker::IsConsString' on the bottom line.
