

v8::internal::Flag
::IsDefault

v8::internal::operator<<

v8::internal::Flag
::int_variable

```
graph LR; A[v8::internal::Flag::IsDefault] --> C[v8::internal::Flag::int_variable]; B[v8::internal::operator<<] --> C;
```

The diagram illustrates a relationship between three code elements. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::Flag' followed by '::IsDefault' on a new line. The bottom box contains the text 'v8::internal::operator<<'. On the right, there is a gray rectangular box containing the text 'v8::internal::Flag' followed by '::int_variable' on a new line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both 'v8::internal::Flag::IsDefault' and 'v8::internal::operator<<' are associated with or point to 'v8::internal::Flag::int_variable'.
