

v8::internal::AllStatic

```
classDiagram
    class AllStatic["v8::internal::AllStatic"]
    class ProtectedWeakFixedArrayShape["v8::internal::ProtectedWeakFixedArrayShape"]
    ProtectedWeakFixedArrayShape --|> AllStatic
```

The diagram illustrates a class hierarchy. The base class, `v8::internal::ProtectedWeakFixedArrayShape`, is shaded gray and contains two public static constants: `+ kMapRootIndex` and `+ kLengthEqualsCapacity`. The derived class, `v8::internal::AllStatic`, is white and has no visible members. A blue arrow with an open triangle head points from the base class to the derived class, indicating inheritance.

v8::internal::ProtectedWeak
FixedArrayShape

+ kMapRootIndex
