

v8::internal::Parser
::ParseFunction

v8::internal::ParserFormal
Parameters::ValidateDuplicate

v8::internal::ParserFormal
Parameters::has_duplicate

```
graph LR; A[v8::internal::Parser::ParseFunction] --> C[v8::internal::ParserFormalParameters::has_duplicate]; B[v8::internal::ParserFormalParameters::ValidateDuplicate] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. Two functions on the left, 'v8::internal::Parser::ParseFunction' and 'v8::internal::ParserFormalParameters::ValidateDuplicate', both have arrows pointing to a third function on the right, 'v8::internal::ParserFormalParameters::has_duplicate'. The target function is highlighted with a gray background.
