

v8::internal::wasm
::gdb_server::GdbServer
::RemoveBreakpoint

```
graph LR; A["v8::internal::wasm  
::gdb_server::GdbServer  
::RemoveBreakpoint"] --> B["v8::internal::wasm  
::gdb_server::GdbServer  
::RunSyncTask"]
```

A diagram showing a call from the `RemoveBreakpoint` function to the `RunSyncTask` function. The left box is shaded gray and contains the text `v8::internal::wasm`, `::gdb_server::GdbServer`, and `::RemoveBreakpoint`. A blue arrow points from the right side of this box to the left side of the right box. The right box is white and contains the text `v8::internal::wasm`, `::gdb_server::GdbServer`, and `::RunSyncTask`.
