

v8::internal::compiler
::Word64Adapter::IsWordNSarShift
OutZeros

```
graph LR; A["v8::internal::compiler  
::Word64Adapter::IsWordNSarShift  
OutZeros"] --> B["v8::internal::compiler  
::Operator::opcode"]
```

A diagram showing a call from the `Word64Adapter::IsWordNSarShift` method to the `Operator::opcode` method. The source box is shaded gray and the target box is white. A blue arrow points from the source to the target.
