

v8::internal::torque  
::TypeVisitor::ComputeType

```
graph LR; A[v8::internal::torque::TypeVisitor::ComputeType] --> B[v8::internal::torque::TypeOracle::GetStructType];
```

A diagram showing a call from the `ComputeType` method of `v8::internal::torque::TypeVisitor` to the `GetStructType` method of `v8::internal::torque::TypeOracle`. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.

v8::internal::torque  
::TypeOracle::GetStructType
