

v8::internal::CppGraphBuilder
Impl::AddEdge

v8::internal::CppGraphBuilder
Impl::VisitForVisibility

v8::TracedReferenceBase::Get

```
graph LR; A["v8::internal::CppGraphBuilder  
Impl::AddEdge"] --> C["v8::TracedReferenceBase::Get"]; B["v8::internal::CppGraphBuilder  
Impl::VisitForVisibility"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes represent source functions: 'v8::internal::CppGraphBuilder Impl::AddEdge' (top) and 'v8::internal::CppGraphBuilder Impl::VisitForVisibility' (bottom). On the right, a gray rectangular box represents the target function: 'v8::TracedReferenceBase::Get'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions call or depend on the target function.
