

v8::internal::RegisterBase  
< XMMRegister, kDoubleAfterLast >

v8::internal::XMMRegister

```
graph BT; XMMRegister[v8::internal::XMMRegister] --> RegisterBase[v8::internal::RegisterBase< XMMRegister, kDoubleAfterLast >];
```

The diagram illustrates an inheritance relationship. A light gray box at the bottom, labeled 'v8::internal::XMMRegister', has two blue arrows pointing upwards to a white box at the top, labeled 'v8::internal::RegisterBase < XMMRegister, kDoubleAfterLast >'. This indicates that 'v8::internal::XMMRegister' inherits from 'v8::internal::RegisterBase'.
