Iterator::GetComment

v8::internal::CodeComments
Iterator::Next

v8::internal::CodeComments
Iterator::GetCommentSize

```
graph LR; A[v8::internal::CodeCommentsIterator::GetComment] --> C[v8::internal::CodeCommentsIterator::GetCommentSize]; B[v8::internal::CodeCommentsIterator::Next] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::CodeCommentsIterator::GetComment' (top) and 'v8::internal::CodeCommentsIterator::Next' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::CodeCommentsIterator::GetCommentSize'. Two blue arrows point from the source functions to the target function, indicating that both 'GetComment' and 'Next' depend on or call 'GetCommentSize'.
