

std::true\_type

```
classDiagram
    class std_true_type["std::true_type"]
    class cppgc_mixin["cppgc::internal::IsGarbageCollectedMixinType< T, false, true >"]
    std_true_type <|-- cppgc_mixin
```

The diagram illustrates an inheritance relationship. At the top is a class box for `std::true_type`, which is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. Below this box is a blue arrow with an open triangular head pointing upwards. At the base of the arrow is a larger, shaded class box for `cppgc::internal::IsGarbageCollectedMixinType< T, false, true >`. This box is also divided into three horizontal sections; the top section contains the class name, and the middle and bottom sections are shaded gray.

cppgc::internal::IsGarbage  
CollectedMixinType< T,  
false, true >
