

v8::internal::anonymous
_namespace{snapshot::cc}
::SnapshotImpl::CheckVersion

v8::StartupData::IsValid

v8::internal::Snapshot
::VersionIsValid

```
graph LR; A["v8::internal::anonymous  
_namespace{snapshot::cc}  
::SnapshotImpl::CheckVersion"] --> C["v8::internal::Snapshot  
::VersionIsValid"]; B["v8::StartupData::IsValid"] --> C;
```

The diagram illustrates two function calls pointing to a common target. The first call, from the top-left box, is `v8::internal::anonymous_namespace{snapshot::cc}::SnapshotImpl::CheckVersion`. The second call, from the bottom-left box, is `v8::StartupData::IsValid`. Both calls point via blue arrows to the target function in the right box, `v8::internal::Snapshot::VersionIsValid`.
