

v8::internal::DbgStreamBuf
::overflow

v8::internal::DbgStreamBuf
::~~DbgStreamBuf

v8::internal::DbgStreamBuf
::sync

```
graph LR; A[v8::internal::DbgStreamBuf::overflow] --> C[v8::internal::DbgStreamBuf::sync]; B[v8::internal::DbgStreamBuf::~~DbgStreamBuf] --> C;
```

The diagram illustrates a relationship between three V8 internal functions. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'v8::internal::DbgStreamBuf::overflow' and the bottom box contains 'v8::internal::DbgStreamBuf::~~DbgStreamBuf'. On the right, a gray rectangular box contains the text 'v8::internal::DbgStreamBuf::sync'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both the 'overflow' and the destructor '~DbgStreamBuf' functions call or interact with the 'sync' function.
