

v8::internal::compiler
::ProcessedFeedback::AsCompare
Operation

```
graph LR; A["v8::internal::compiler  
::ProcessedFeedback::AsCompare  
Operation"] --> B["v8::internal::compiler  
::ProcessedFeedback::kind"]
```

A diagram showing a mapping from a specific operation to a kind. On the left, a gray box contains the text 'v8::internal::compiler', '::ProcessedFeedback::AsCompare', and 'Operation' on three lines. A blue arrow points from this box to a white box on the right. The white box contains the text 'v8::internal::compiler' and '::ProcessedFeedback::kind' on two lines.
