

v8::internal::MacroAssembler  
::CallBuiltin

v8::internal::MacroAssembler  
::TailCallBuiltin

v8::internal::MacroAssembler  
Base::BuiltinEntry

```
graph LR; A[v8::internal::MacroAssembler::CallBuiltin] --> C[v8::internal::MacroAssemblerBase::BuiltinEntry]; B[v8::internal::MacroAssembler::TailCallBuiltin] --> C;
```

The diagram illustrates a mapping from two specific V8 internal macro assembler functions to a common base entry. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::MacroAssembler::CallBuiltin' and the bottom box contains 'v8::internal::MacroAssembler::TailCallBuiltin'. On the right, there is a single gray rectangular box containing the text 'v8::internal::MacroAssemblerBase::BuiltinEntry'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'CallBuiltin' and 'TailCallBuiltin' are implemented by or mapped to the 'BuiltinEntry' in the 'MacroAssemblerBase'.
