

v8::Global::Global

v8::Global::operator=

v8::api_internal::MoveGlobal
Reference

```
graph LR; A[v8::Global::Global] --> C[v8::api_internal::MoveGlobal Reference]; B[v8::Global::operator=] --> C;
```

The diagram illustrates a relationship between two V8 Global methods and a shared reference. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'v8::Global::Global' and the bottom box contains 'v8::Global::operator='. Blue arrows point from the right side of each of these boxes to a single gray rectangular box on the right. This gray box contains the text 'v8::api_internal::MoveGlobal' on the top line and 'Reference' on the bottom line. The gray box has a black border and a light gray fill.
