

v8::internal::interpreter
::BytecodeGenerator::ControlScope
::PopContextToExpectedDepth

```
graph LR; A["v8::internal::interpreter  
::BytecodeGenerator::ControlScope  
::PopContextToExpectedDepth"] --> B["v8::internal::interpreter  
::BytecodeGenerator::execution  
_context"]
```

A diagram showing a call from a ControlScope to an execution_context. The left box, with a grey background, contains the text 'v8::internal::interpreter', '::BytecodeGenerator::ControlScope', and '::PopContextToExpectedDepth'. A blue arrow points from this box to a white box on the right. The right box contains the text 'v8::internal::interpreter', '::BytecodeGenerator::execution', and '_context'.
