

v8::internal::wasm
::NativeModule::SetWireBytes

```
graph LR; A["v8::internal::wasm  
::NativeModule::SetWireBytes"] --> B["v8::internal::wasm  
::NativeModule::wire_bytes"]
```

A diagram showing a call from the `SetWireBytes` method to the `wire_bytes` property. The left box is shaded gray and the right box is white. A blue arrow points from the left box to the right box.

v8::internal::wasm
::NativeModule::wire_bytes
