

v8::internal::MacroAssembler
::CmovX

v8::internal::MacroAssembler
::CzeroX

v8::internal::Assembler
::csel

```
graph LR; A["v8::internal::MacroAssembler::CmovX"] --> C["v8::internal::Assembler::csel"]; B["v8::internal::MacroAssembler::CzeroX"] --> C;
```

The diagram illustrates a relationship between three V8 internal objects. On the left, there are two white rectangular boxes. The top box contains the text 'v8::internal::MacroAssembler::CmovX' and the bottom box contains 'v8::internal::MacroAssembler::CzeroX'. On the right, there is a gray rectangular box containing the text 'v8::internal::Assembler::csel'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both MacroAssembler objects are associated with or point to the Assembler object.
