

v8::internal::compiler
::RegisterAllocationData
::GetPhiMapValueFor

```
graph LR; A["v8::internal::compiler  
::RegisterAllocationData  
::GetPhiMapValueFor"] --> B["v8::internal::compiler  
::TopLevelLiveRange::vreg"]
```

A diagram showing a call from the `RegisterAllocationData::GetPhiMapValueFor` method to the `TopLevelLiveRange::vreg` variable. The source box is shaded gray and the target box is white. A blue arrow points from the source to the target.

v8::internal::compiler
::TopLevelLiveRange::vreg
