

v8::internal::torque
::TypeVisitor::ComputeType

```
graph LR; A["v8::internal::torque  
::TypeVisitor::ComputeType"] --> B["v8::internal::torque  
::TypeOracle::GetAbstractType"]
```

A diagram showing a call from the `ComputeType` method of `v8::internal::torque::TypeVisitor` to the `GetAbstractType` method of `v8::internal::torque::TypeOracle`. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
