

v8::base::ThreadEntry

```
graph LR; A[v8::base::ThreadEntry] --> B[v8::base::Thread::NotifyStartedAndRun]
```

A diagram showing a call from v8::base::ThreadEntry to v8::base::Thread::NotifyStartedAndRun. The first box, v8::base::ThreadEntry, is shaded gray and has a black border. A blue arrow points from its right side to the second box, v8::base::Thread::NotifyStartedAndRun, which is white with a black border. The text in the second box is split into two lines.

v8::base::Thread::Notify  
StartedAndRun
