

v8::internal::ErrorUtils
::Construct

v8::internal::ValueDeserializer
::ReadVarint

v8::Maybe::ToChecked

```
graph LR; A[v8::internal::ErrorUtils::Construct] --> C[v8::Maybe::ToChecked]; B[v8::internal::ValueDeserializer::ReadVarint] --> C;
```

The diagram illustrates a dependency or call relationship. Two source boxes on the left, 'v8::internal::ErrorUtils::Construct' and 'v8::internal::ValueDeserializer::ReadVarint', both have blue arrows pointing to a target box on the right, 'v8::Maybe::ToChecked'. The target box is shaded gray, while the source boxes are white with black borders.
