

v8::internal::WeakCollections  
BuiltinsAssembler::AddEntry

v8::internal::WeakCollections  
BuiltinsAssembler::RemoveEntry

v8::internal::WeakCollections  
BuiltinsAssembler::ValueIndexFrom  
KeyIndex

```
graph LR; A["v8::internal::WeakCollections  
BuiltinsAssembler::AddEntry"] --> C["v8::internal::WeakCollections  
BuiltinsAssembler::ValueIndexFrom  
KeyIndex"]; B["v8::internal::WeakCollections  
BuiltinsAssembler::RemoveEntry"] --> C;
```

The diagram illustrates a relationship between three V8 JavaScript engine functions. On the left, two white rectangular boxes represent source functions: 'v8::internal::WeakCollections BuiltinsAssembler::AddEntry' (top) and 'v8::internal::WeakCollections BuiltinsAssembler::RemoveEntry' (bottom). On the right, a gray rectangular box represents the target function: 'v8::internal::WeakCollections BuiltinsAssembler::ValueIndexFrom KeyIndex'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both 'AddEntry' and 'RemoveEntry' utilize the 'ValueIndexFrom KeyIndex' function.
