

std::true\_type

```
graph BT; A["v8::internal::maglev::detail::is_iterator_range<base::iterator_range<T>>"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded box representing the base class `v8::internal::maglev::detail::is_iterator_range<base::iterator_range<T>>`. A blue arrow points upwards from this box to a white box at the top representing the derived class `std::true_type`. The white box is divided into three horizontal sections, with the top section containing the class name.

v8::internal::maglev  
::detail::is\_iterator
